## ▼ Outline ▼

It is a basically a quiz show. Four players discuss and try to decide on one answer for the quiz.

The feature of this game has two components, one as an ordinary quiz show and one as a werewolf game format that is between two groups: a werewolf who know the answer, and three players who do not.

The werewolf called “X”, is secretly assigned in advance.

All players try to come up with the answer for the quiz while they debate the identity of “X”.

The three players must try to get the correct answer while “X” try to mislead the players to get all the questions wrong.

That undoubtedly highlights the tactics and psychological warfare in all players!
