“The older brother should always be ahead of the younger one...”

Once upon a time there were two brothers, Hibito and Mutta. Hibito, the littler brother, had been blessed with good luck since the day he was born. Mutta, the elder, had always had bad luck. One day, the two brothers saw a UFO. This experience made them decide to become astronauts. And while Hibito succeeded, Mutta went to work for a car company. Then he caused an incident and had to quit. And then just as Hibito is about to fly to the moon...

When they were little, two brothers, Mutta and Hibito made a promise to each other as they looked up into the night sky. In the year 2025, Hibito has kept his promise and become an astronaut, part of the first wave of people to live for an extended period of time on the moon.

Meanwhile, his older brother Mutta has been fired from his job and is unemployed. But one message from his brother makes him decide to start being an astronaut again.

Thirty two year old Mutta will attempt the astronaut candidate examinations.

To follow his brother Hibito to the moon, Mutta will attempt to become an astronaut at the age of 32. Unaware of his own talent, elder brother Mutta chases his dreams to get back in front of his younger brother.

Believing the words “The older brother should always be ahead of the younger one...”

Older brother Mutta Nanba

Went to work for a car design company after graduation. When a manager insulted his younger brother, he gave him a head butt and was fired. After he gets a message from Hibito, he decides to try and become an astronaut.

Younger Brother Hibito Nanba

An extraordinarily talented astronaut, chosen to be the first Japanese person to go to the moon. He's known as the "Samurai Boy" in America, where he's very popular. He really wants Mutta to become an astronaut.
